WHAT IS *BINGAZO*?

BINGAZO is a pioneering Software as a Service (SaaS) company specializing in multiplayer 90-Ball Bingo solutions for gaming establishments.

BINGAZO Versatility Enables the Transition from Traditional Bingo Operations to an Omnichannel Model:
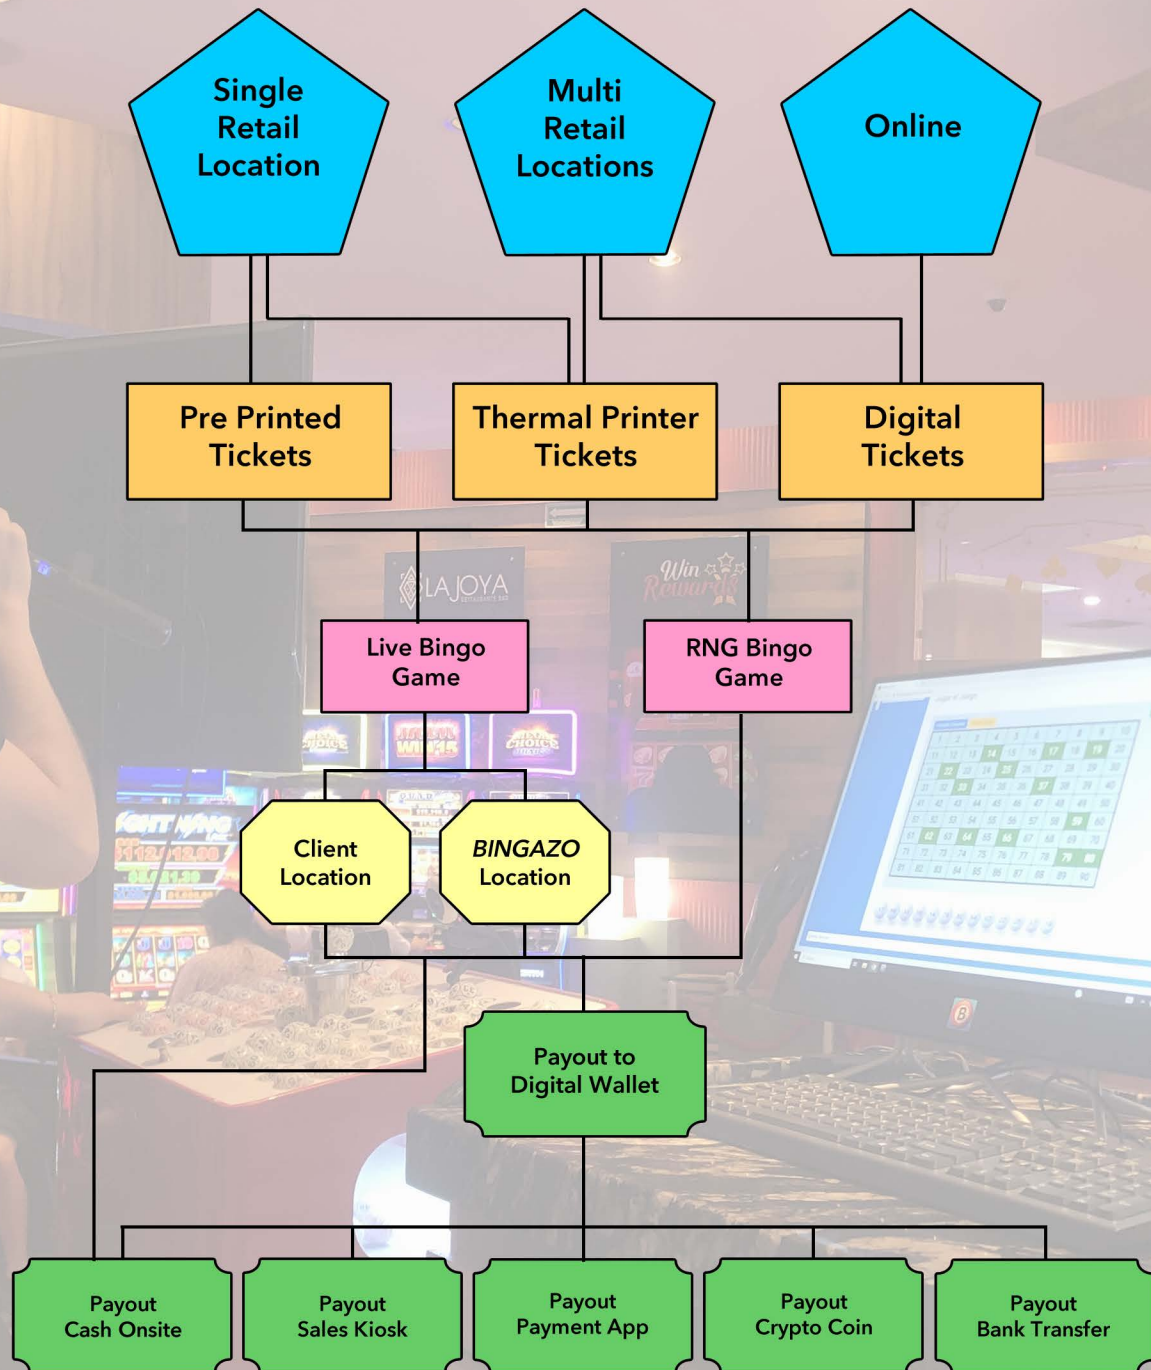

BINGAZO offers cutting-edge Bingo software designed to revolutionize the traditional experience. Its innovative variants and features enhance gameplay and player engagement while meeting the evolving demands of the gaming industry.

Retail establishments, multi-venue stores, and online channels are interconnected through the *BINGAZO* platform. This flexibility allows bingo operators to adapt to changing consumer preferences and market dynamics, offering a cohesive experience across multiple channels.

BINGAZO's advanced technology facilitates the integration of retail and online channels, allowing players to access bingo games from anywhere, anytime. Whether in a physical establishment or online, players can enjoy a consistent and immersive gaming experience.

What Advantages Does BINGAZO Offer to Players and Gaming Operators?

With **BINGAZO**, managing your bingo hall is simple and efficient. From an intuitive control panel available in English or Spanish, you can issue and verify 90-ball tickets in real time. Our system handles everything from small events with 2,000 tickets to nationwide games with 6 million tickets—always ensuring accuracy, security, and perfect integration with your operations.

Game Control Board

BINGAZO uses an intuitive Game Control Dashboard that allows for complete and easy control of your Bingo games. Game controls available in English or Español.

Game Ticket Tracking

BINGAZO can issue, track and verify 90 Ball Bingo Tickets. With each ball called, the system will mark the numbers on all cards in play notifying that a Line is filled and when a Bingo is won.

*Series of tickets from other companies can be added.

6 Million Bingo Tickets

BINGAZO can play any size ticket series from 12,000 for single locations to 6,000,000 individual Bingo tickets for national-level bingo games! This massive series is built to support high-stakes, large-scale operations while ensuring accuracy, security, and seamless integration with our digital and point-of-sale systems.

# Flexible Drawing Options
Play your way

BINGAZO adapts to any bingo style: physical balls for live excitement or RNG for a fully automated game. Numbers can be entered quickly via touchscreen or read automatically with our innovative RFID balls, which instantly transmit each drawn number.
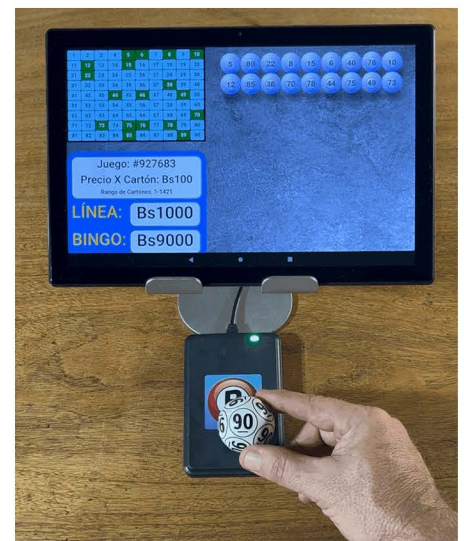

Physical Bingo Balls or RNG

BINGAZO can be used with Physical Bingo Balls or Random Number Generator (RNG) to play your Bingo Games. Some markets want the game to be completely automatic while others prefer the Live action and see the balls be selected. With **BINGAZO** you can do both.

Touch Screen Ball Number Entry

BINGAZO is designed for fast and easy called number input when using physical Bingo balls. Game managers can use a tablet or touch screen to quickly enter each selected ball number.

RFID Ball Number Entry

BINGAZO developed NFC-compatible bingo balls that work seamlessly with the BINGAZO system. This new feature allows the software to auto-read and display each drawn ball instantly.
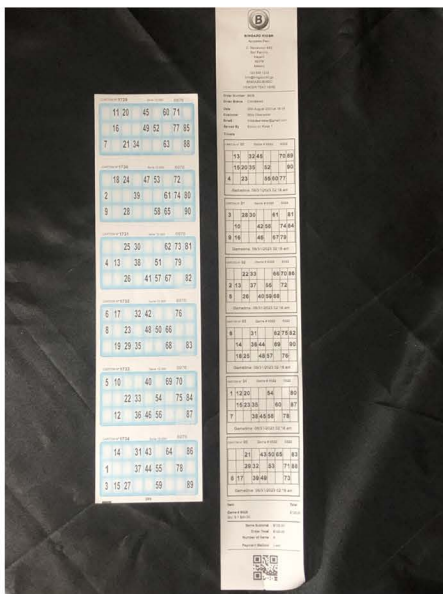

# Smart Printing & Sales
Tickets ready in any format

Use pre-printed tickets or print them on-demand with a thermal receipt printer. Create custom tickets with a standard office laser printer for maximum flexibility and savings. Our integrated POS system allows sales from multiple agents or kiosks, with automatic system registration for instant game starts.
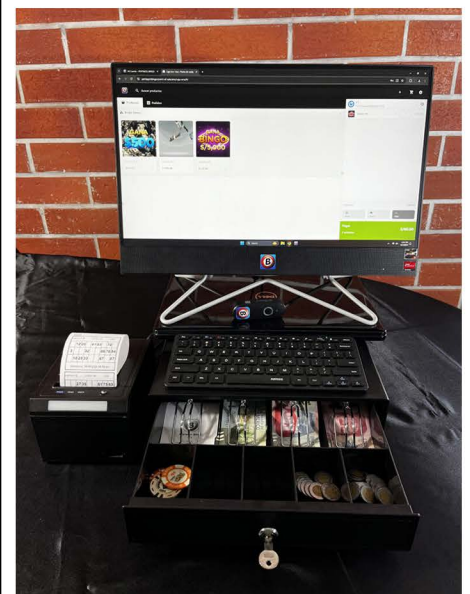

Pre-Printed or Thermal Printed Tickets	Print Your Own Custom Bingo Tickets	Sell Tickets Using the Point of Sale System

BINGAZO can be used with Series 12000 - Pre-Printed Paper Tickets or you can print Tickets direct from a standard Thermal Receipt Printer.

BINGAZO can print your own high-quality, customizable pre-printed tickets using a standard office laser printer— offering a cost-effective alternative to purchasing them from suppliers.

BINGAZO has a built in Point of Sale system (POS) where tickets can be sold at multiple agent or kiosk locations. When it's time to play the game, all sold tickets are automatically entered into the system.

Sales Without Limits
Sell more, in more places

With **BINGAZO's** mobile POS, your team can sell tickets anywhere with a cellular connection, printing QR-coded receipts for instant digital ticket access. Sell online with your own white-label website and offer presale pricing to encourage early purchases.
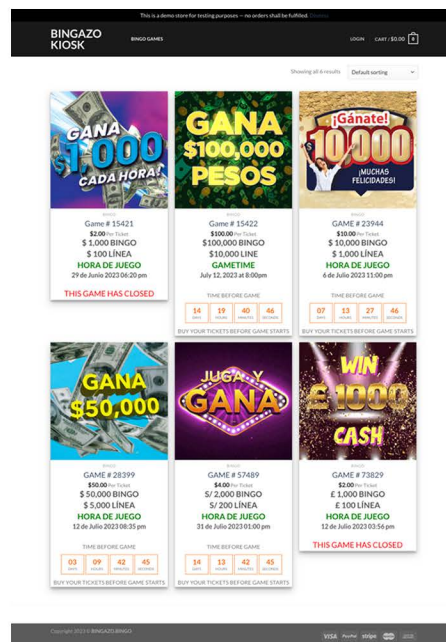

Mobile Ticket Sales

BINGAZO Mobile Point of Sale (POS) Ticket System is a portable, cellular-connected solution that lets your team sell bingo tickets anywhere. It prints a QR-coded receipt for instant digital ticket access on any phone – no app needed. All sales sync into a unified game feed, allowing seamless, scalable operations that drive greater reach, higher sales, and bigger jackpots.

Sell BINGO Tickets Online

BINGAZO includes your own "White Label" e-commerce website where customers can view your Bingo events and make ticket purchases. The site can be customised to your brand and color palette.

Presale Ticket Pricing

BINGAZO allows you to have Presale Ticket Pricing for players who make purchases in advance. Tickets can be sold at a lower cost then tickets just before the game.

Modern Transactions & Payments
From ticket to digital wallet

Every printed ticket includes a QR code to verify winnings and access the player's digital wallet. RFID/NFC Player's Club cards make transactions and credit assignment simple. **BINGAZO** Credits let players pay and cash out within the system at a 1:1 value to the local currency.

Tickets Can Be Scanned

Tickets printed with **BINGAZO** have a QR code that can be scanned to verify if it is a winner and will show the player's digital wallet balance allowing for a cash withdraw.

Use Custom Player's Club Cards

BINGAZO can read RFID or NFC Player's Club Cards allowing players to tap their card for transactions. Each Player can be assigned a custom club card member number to aid in transactions, credits and payouts.

BINGAZO Credits & Digital Wallet

BINGAZO CREDITS, a secure digital currency players can use to seamlessly purchase bingo tickets within the system. Credits maintain a 1:1 value with the bingo operator's national currency. Whenever a player wins a Line or Bingo, their account will be automatically credited with BINGAZO coins, adding to their digital wallet. Players can cash out anytime.

Global Payments & Connectivity
## Bring your bingo into the digital world

Accept over 75 cryptocurrencies for ticket purchases and prize payouts. Email tickets to customers who buy online or at a POS. With wireless streaming technology, share live results, prizes, and animations to unlimited TVs, tablets, or mobile devices.

BINGAZO Crypto

BINGAZO allows players to purchase their bingo tickets using cryptocurrencies with over 75 different coins to choose from. Players can also have their winnings paid out in Crypto.

Players Can Have Tickets Emailed to Them

BINGAZO can send an email to customers who purchased their Bingo tickets online or thru a sales location or kiosk.

Wireless Multi Monitor Broadcasting

BINGAZO uses the latest Web technology to wirelessly broadcast multiple channels of LIVE information such as Game ID, Prizes, Called Numbers, Animated Bingo Balls, Flashboard and more to an unlimited number of TV monitors, Tablets and Cellphones over WiFi.

# Live Bingo Production
Turn your game into a show

Stream live ball draws with a webcam. Integrate the **BINGAZO** plugin for OBS Studio to produce events with multiple cameras, microphones, graphics, and TV-style transitions. Personalize your game with variations like ANIMAL BINGO, pairing each ball with a unique image.

Transmit Called Balls LIVE Video

BINGAZO comes with a mountable webcam and the ability to transmit LIVE Video to Flashboard monitors and connected devices. Players can watch all the action as Bingo balls exit your blower machine or ball cage.

BINGAZO OBS Studio LIVE Bingo Show Plugin

With **BINGAZO** OBS Studio plugin you can turn your bingo room into a fully produced LIVE BINGO SHOW by connecting to our Real-Time LIVE Streaming server platform.

Stream Multi-Camera angles, Microphone and Multi-Scene Production with use of professional graphics, overlays, and transitions just like a TV broadcast.

Custom Bingo Game Variations

BINGAZO allows for Custom Game Configuration by associating ball numbers with images. Our **ANIMAL BINGO** version pairs each of the 90 bingo balls with a unique animal image, blending the classic gameplay everyone loves with a fun, visual experience that brings added excitement and engagement.

BINGAZO

BINGO Game Management & Display System

Full Multimedia Experience
Look and sound better

Announce each number in up to two languages at once, with professional voices in six languages and more available on request. Connect any TV with the *BINGAZO APP STICK* in seconds, or use the Android app to display real-time game info wirelessly.

Transmit Called Balls Audio

Choose from 6 voices - Spanish (Mexico), English (USA), Portuguese (Brazil), Spanish (Spain), Italian & French. Call up to two languages consecutive and players can select their own language to hear. Languages can be added upon request.

Download the *BINGAZO* app

Google Play Store

Download the *BINGAZO* Display App from the Google Play Store and connect an unlimited number of Android devices to display your Bingo game info and flashboard wirelessly in real-time.
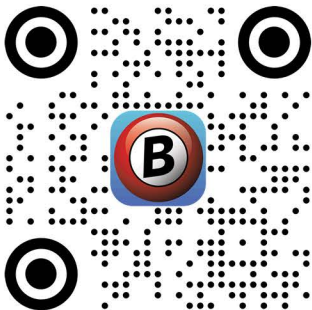

BINGAZO App Stick

With this *BINGAZO* digital WIFI App Stick, TV's can be connected in less than a minute. No long wires, signal splitters or fuzzy reception. Just Plug n' Play!

Direct Player Engagement
Bingo in the palm of your hand

Players connect instantly by scanning a QR code—no app downloads required. They can view numbers in real time on their device and add physical tickets for automatic marking and win notifications, increasing engagement and sales.
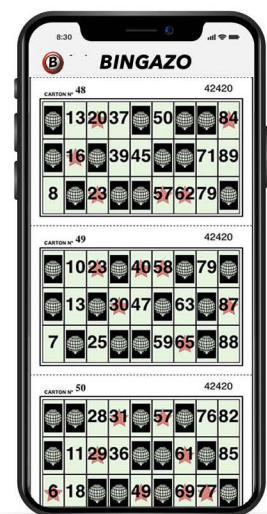

Players Can Easily Connect Using QR Code

Players can instantly connect to **BINGAZO** as a Progressive Web App (PWA) just by aiming their iPhone or Android device camera at the QR code on your TV monitor or printed materials.

Transmit Ball Numbers to Players Cell Phone or Device

Players who are connected to **BINGAZO** can view Bingo game info, called numbers and Flashboards on their phone or tablet in real-time.

Auto Mark Player Tickets & Notify of Win

Players connected to **BINGAZO** can easily add an unlimited number of physical tickets they purchased and watch them be checked and played automatically bettering their odds of winning and making game operators more sales.

Real-Time Communication, Advertising & Insights

With **BINGAZO**, every screen and connected device becomes a tool to boost your operations. Send custom ads to TVs and player devices before and after games to promote prizes or specials. Access powerful analytics to review sales, called numbers, winners, and results—optimizing performance like never before. And with WhatsApp integrated directly into the **BINGAZO** dashboard, managers can instantly connect with tech support, any sales kiosk or register, or even customers—just click to connect.

Broadcast Advertisements to User Devices & TV Monitors

BINGAZO lets you broadcast custom ads to connected devices. Have a Grand Prize Game or Running a Food & Bar Special? Let everyone know about it with a touch of a button. When you are ready to continue, all screens will switch back to the Bingo Game.

Game History & Analytic Data

BINGAZO has a powerful database that keeps track of all the information and results of your bingo games. Managers can review the data of each game to see each ticket sold, what numbers were called, what were the prizes, who won, profits and much more. Bingo administrators have never had analytics like this at their disposal.

WhatsApp Integration

A fully integrated WhatsApp messaging feature within the **BINGAZO** dashboard that allows Bingo managers to instantly connect with technical support, any sales location, kiosk, register, or even directly with customers. With a single click, managers can send messages, share updates, resolve issues, or coordinate operations – all without leaving the **BINGAZO** interface.

Who is *BINGAZO*?

BINGAZO is the creation of Enrico Rossi, a developer and entrepreneur with over three decades of experience at the intersection of computer science, entertainment, and software innovation. To build ***BINGAZO***, Enrico leveraged all the experience and skills he has developed over 30 years in the industry, spanning application development, server architecture, web systems, multiple programming languages, real-time communications, and video streaming technologies.

BINGAZO is the result of four years of development, testing, and refinement, becoming a fully integrated SaaS platform that enables casinos, gaming venues, and event operators to offer live 90-ball multiplayer bingo games on multiple devices, from casino screens to player's mobile phones.

Today, ***BINGAZO*** combines cutting-edge video streaming, ticket vending, secure payment processing, and real-time game management into a single integrated system. It offers operators the freedom to interact with players anywhere—on the floor, online, or at special events—while delivering a consistent, high-quality entertainment experience.

Tested in multiple casinos over the past two years, ***BINGAZO*** is a proven, reliable, and expansion-ready platform, offering casino operators, distributors, and investors the opportunity to be part of the future of Live Bingo.
